Sequence 33, Application US/09016520A

Patent No. 6127533

GENERAL INFORMATION:

APPLICANT: Cook, Phillip D

APPLICANT: Kawasaki, Andrew

TITLE OF INVENTION: Aminooxy-Modified Oligonucleotides

FILE REFERENCE: ISIS2824

CURRENT APPLICATION NUMBER: US/09/016,520A

CURRENT FILING DATE: 1998-01-30

EARLIER APPLICATION NUMBER: 60/037,143

EARLIER APPLICATION NUMBER: 05/037,143

EARLIER APPLICATION NUMBER: 05/037,143
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             श
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        문
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  용

Sequence 6, Application US/09123108

Patent No. 6271358

Patent No. 6271358

GENERAL INFORMATION:
APPLICANT: Manoharan, Muthiah
APPLICANT: Mohan, Venkatraman
APPLICANT: Boswell, Herb

TITLE OF INVENTION: RNA TARGETED 2'-MODIFIED OLIGONUCLEOTIDES THAT ARE
TITLE OF INVENTION: CONFORMATIONALLY PREORGANIZED
FILE REFERENCE: ISIS-3147 sequence listing
CURRENT APPLICATION NUMBER: US/09/123,108
CURRENT APPLICATION NUMBER: US/09/123,108
CURRENT FILING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 22
SOFTWARE: Patentin Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ; NAME/KEY: misc_feature

TITLE OF INVENTION: Regioselective Synthesis of 2'-O-Modified Nucleosides
FILE REFERENCE: ISIS3315
CURRENT APPLICATION NUMBER: US/09/227,782
CURRENT FILING DATE: 1999-01-08
NUMBER OF SEQ ID NOS: 28
SOFTMARE: PatentIn Ver. 2.1
SEQ ID NO 6
LENGTH. 1
                                                                                                                                                                                                                                                                                                                                                 Sequence 6, Application US/09227782
Patent No. 6403779

SEQ ID NO 25

LENGTH: 19

TYPE: DNA
ORGANISM: Artificial Sequence
FEATURE:
OTHER INFORMATION: Description of Artificial Sequence: Synthetic construct
NAME/KEY: misc feature
LOCATION: (15)...(18)
OTHER INFORMATION: 2'-methyleneiminooxyethoxy
                                                                                                                                                      APPLICANT: An, Haoyun
TITLE OF INVENTION: C3'-Methylene Hydrogen Phosphonate Oligomers and Related Compound:
FILE REFERENCE ISIS-3312
CURRENT APPLICATION NUMBER: US/09/349,033A
CURRENT FILING DATE: 1999-07-07
NUMBER OF SEQ ID NOS: 12
SOFTWARE: Patentin version 3.1
SEQ ID NO 1
LENGTH: 19
TYPE: DNA
